

CONFIRMATION

Number 365-004

EGOSILICONE 365

Based on test report no. G12739BB by Eurofins Product Testing A/C
EGO Dichtstoffwerke confirms the following requirements für EGOSILICONE 365:

-  low VOC-content according to LEED credit EQ c4.1 (adhesives and sealants)
-  VOC content is below the limit value for architectural sealants specified as 250g VOC per liter (minus water)
-  The content of volatile substances (incl. water) was calculated by Eurofins. The water content was assumed to be zero. The dry matter content was calculated by Eurofins. The content of the excluded substances was assumed to be zero.

Based on the results from test report No. G12739BB dated 04/01/2012, Eurofins assesses that the product meets the requirements in LEED credit EQ c4.1 (Adhesives and Sealants).
