

CONFIRMATION

365-005

EGOSILICON 365 ALL IN ONE

We hereby confirm that the above-mentioned product has been developed as a waterproof sealant for various applications in construction, specifically for permanent wet areas to seal swimming pools. We declare that this product is a proven, high-quality sealant that has been successfully used for several decades, including in pool areas. We confirm that the product, in accordance with the product descriptions in the data sheet, meets the usual requirements for pool silicone based on the current state of technology and material-specific tolerances.

The technical properties must be taken into account when planning the joints. The conditions of use and application requirements must be met. The user must check the suitability of the product for the intended application by means of preliminary tests. This also includes clarifying compatibility with adjacent building materials, substrates and liquids that come into contact with the sealant. We recommend conducting further tests under real conditions on the building structure before use. Elastic joints that are exposed to strong chemical and/or physical influences must be regularly maintained and cared for.
