

EGO GLÄTTMITTEL CONCENTRATE

is a liquid and colorless smoothing agent for smoothing all types of surfaces.

CHARACTERISTICS

The product is characterized by the following properties:

concentrated · can be diluted with water as required, depending on the sealant and application · facilitates clean and easy smoothing
provides an even sealant surface · preserves the gloss of the sealant surface · prevents washing out of the sealant's colour pigments
also suitable for natural stone applications

APPLICATION AREAS

EGO GLÄTTMITTEL CONCENTRATE is suitable for silicone, HYBRID [SMP], PU and acrylic sealants when diluted with water [approx. 1:100]
and can also be used for marble and other natural stone applications.

APPLICATION NOTES

- ① Before use, thoroughly homogenise the Smoothing Agent Concentrate. Shake bottles and canisters well; stir larger containers with a clean stirring tool.
- ② Use the diluted Smoothing Agent fresh and as sparingly as possible. A mixing ratio of approx. 1 part concentrate to 100 parts water is recommended.
- ③ Lightly wet the smoothing tools or apply the Smoothing Agent sparingly and evenly to the sealant surface. Residues on the sealant joint or adjacent surfaces must be completely removed with clean water before they dry, as dried residues may cause visual impairments such as dull areas or stains.
- ④ For sensitive substrates [wood, rough or absorbent materials], mask the adjacent areas with suitable masking tape and remove it immediately after smoothing.
- ⑤ Before application, compatibility with adjacent materials and surfaces must be checked by carrying out a preliminary test. Due to the wide variety of possible substrates and application conditions, a trial application is generally recommended.

TECHNICAL DATA

Specifications	Results
Dosage EGO GLÄTTMITTEL CONCENTRATE	Dilutable at a ratio of 1:100 [one capful per 1 L of clean water]
Compatibility	free from solvents, complexing agents, dyes, fragrances and other substances that could discolour the sealant
pH value	approx. 5-6; approx. 7 when diluted

AVAILABILITY AND STORAGE

Standard colour	colourless
Packaging	■ 1000 ml bottle
Storage	Can be stored in its original packaging in a cool, dry place: ■ 24 months

SAFETY INFORMATION

Complies with	Regulation [EC] No. 1907/2006 [REACH] and No. 1272/2008 [CLP]
Labelling	see SDS
Safety instructions	see SDS
Disposal instructions	see SDS
